Subject: Follow up to the 5/20 Conference Call - Vogel Paint and Wax Co., Iowa
Attachments: OSWER Directive 9283.1-33.pdf; OSWER Directive 9283.1-44.pdf; OSWER Directive 9355.0-129.pdf

Sandeep, Susan and Lynn: Please forward to IDNR as appropriate.

This email is in follow-up to the conference call conducted on May 20th regarding the Vogel Paint and Wax Co., Maurice Iowa, Superfund site. Participants for this conference call included Iowa Department of Natural Resources (DNR), Environmental Protection Agency (EPA) Region 7 and staff from EPA Headquarters Assessment and Remediation Division (ARD staff). The agenda included discussions of the path forward on a Record of Decision Amendment (RODA) or an Explanation of Significant Differences (ESD) considering the Responsible Party's proposal to implement a pilot study to evaluate whether in-situ bioremediation (ISB) and permeable reactive barrier (PRB) would impact and reduce the chemicals of concern in the groundwater plume. The pilot study also includes work to address issues and recommendations from the pending 2019 Five-Year Review Report under development. EPA Region 7 approved the work plan for the pilot study in May 2019.

ARD staff concluded the following based on information provided by IDNR:

Ex. 5 Deliberative Process (DP)

Best regards,
ARD staff.

Heather Newton
